OBJECTIVE

- Motivated and detail-oriented developer with Detail-oriented developer with expertise in Machine Learning, ASP.NET Core, Flutter, and Python, seeking to contribute to growth-focused companies by developing customized software solutions. businesses. Eager to contribute to growth-focused companies by creating accessible tools that empower users with insights and confidence.

PROJECTS

- **Group Expense Manager** [Link](#) **Nov 2024 - Feb 2025**
 - Automatically calculates individual expenses and balances.
 - Manages multiple groups and tracks expenses individually.
 - Built frontend using Flutter and integrated backend services via .NET APIs, ensuring smooth data communication.
 - Visualizes financial data through dynamic pie and bar charts for better insights.
- **Medicine Recommended System** [Link](#) **Feb 2025 - March 2025**
 - Developed and deployed a web-based healthcare assistant using Flask for symptom-driven disease and wellness guidance.
 - Used structured CSV datasets to map symptoms to disease descriptions, precautions, medications, workouts, and diet plans.
 - Implemented voice-based symptom input using speech recognition to enhance user interaction and accessibility.
 - Designed an intuitive and responsive user interface with HTML, CSS, and JavaScript.
 - Hosted the application live on Render.com, enabling public access and real-time interaction.
- **Stock Market Analysis** [Link](#) **March 2025 - April 2025**
 - Built a Flask web app to predict stock trading volume using machine learning.
 - Used Random Forest Regressor trained on historical stock prices and date-related features.
 - Integrated a clean and interactive UI for real-time predictions.
 - Deployed the application on Render.com for public access.

EXPERIENCE

- **Teaching Assistance | Darshan University** **Nov 2024 - March 2025**
 - Assisting in teaching Database Management Systems (**DBMS-2**) for **BCA** and **BSC-IT** students.
 - Guiding students on project work and conceptual understanding.
 - Assisting in lab sessions and problem-solving activities.

- **Automation Developer**
Untie-It Technologies | 6 Months
 - Worked as an Automation Developer with UiPath and RPA.
 - Built automation workflows with data handling and process logic.
 - Interested in Flutter, Python, ML, and DBMS-based development roles
- **Full Stack Developer Intern**
Multiicon | 3 Months
 - Worked on Angular and .NET full stack development projects.
 - Explored flight booking system workflows, APIs, repositories, and database operations.
 - Learned Angular forms, validations, routing, and component communication.
 - Gained understanding of REST APIs, caching, payment modules, and booking workflows.

SKILLS

- **Technical:** Machine Learning, Data Structures, Python, NumPy, Pandas, Scikit-learn, Flutter, DBMS, SQL, Java
- **Non-Technical:** Teamwork, Quick Learner, Adaptability, Problem-Solving.

EDUCATION

- **Bachelor of Engineering in Computer Engineering | Darshan University** **2022 - 2026**
 - CGPA: 9.15
- **Higher Secondary Education | Shree Kanya Vidyalaya, Rajkot** **2021 - 2022**
 - Percentage: 78.83
- **Secondary Education | Bardanwala Kanya Vidyalaya, Rajkot** **2019 - 2020**
 - Percentage: 78

CERTIFICATES

- Mobile Application Development – Udemy [<Certificate>](#) **Sept 2024**
- Database Management System - Udemy [<Certificate>](#) **Jan 2025**
- Python Programming – Udemy [<Certificate>](#) **April 2024**

ACHIEVEMENTS

- NPTEL Certificate achieved by participating in Python f [<Certificate>](#) **Aug 2024**
Data Science. Achieved score 71%.
- Earned a SQL certificate from Hacker Rank for completing SQL [<Certificate>](#) **Aug 2024**
challenges.
